SMART INDIA HACKATHON 2026

SCOURGE

Ask the bank, not the paper.

- **Problem Statement ID –** SIH26265
- **Problem Statement Title –** Streamline of Security Deposit / FDR Portal
- **Theme –** Smart Automation
- **PS Category –** Software
- **Team ID –** 199322
- **Team Name (Registered on portal) –** Arnavax#

SCOURGE

SCOURGE — ASK THE BANK, NOT THE PAPER

SMART INDIA HACKATHON 2026

Proposed Solution (Describe your Idea/Solution/Prototype)

The bank's own website proves the FDR: no bank API, no agreement, no paper. AICTE sees only that record.

Detailed explanation of the proposed solution

AICTE sends a **single-use challenge** for one FDR. The institution opens its own net banking; the connection key is **split with AICTE's verifier** (MPC-TLS), so nobody can fake the page. Login, OTP and PAN stay with the institution.

How it addresses the problem

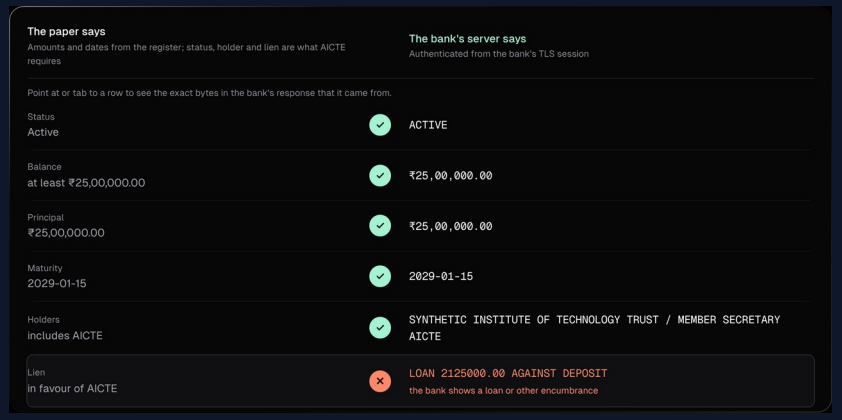

Paper is checked once and trusted for 10 years. Scourge **re-checks the bank any time and before every release**: a loan, early encashment, missing pledge (lien) or fake FDR shows up as a **Discrepancy**.

Innovation and uniqueness of the solution

Works with banks' existing net banking: no bank API or agreement needed, and API-ready when banks offer one. If a page cannot show a field: bank-signed e-advice, then branch confirmation. Fakes and replays are rejected.

LIVE PROTOTYPE · SYNTHETIC BANK

The bank's server contradicts the paper.

× HIDDEN LOAN CAUGHT

Every value traces to the bank's own bytes

The complete FDR lifecycle in one portal (all five stages run in the prototype)

1 FILE
Institution files online; renewals linked

→

2 PROVE
Bank-session proof on AICTE's challenge

→

3 MONITOR
T-90/60/30/7 alerts; adequacy; MT940/camt.053 reconcile

→

4 DECIDE
Verdict + evidence; hash-chained audit

→

5 PLEDGE RELEASE
Dept clearances, 2 signers, holds; QR-signed letter

Why now: **₹201.42 crore of FDRs "do not appear in IDFC's records"** (CBI chargesheet, Oct 2026); AICTE joint FDRs found encashed or loaned against without consent.

SCOURGE

TECHNICAL APPROACH

SMART INDIA HACKATHON 2026

Technologies to be used

Proof layer
TLSNotary MPC-TLS · Rust
Selective disclosure · rustls

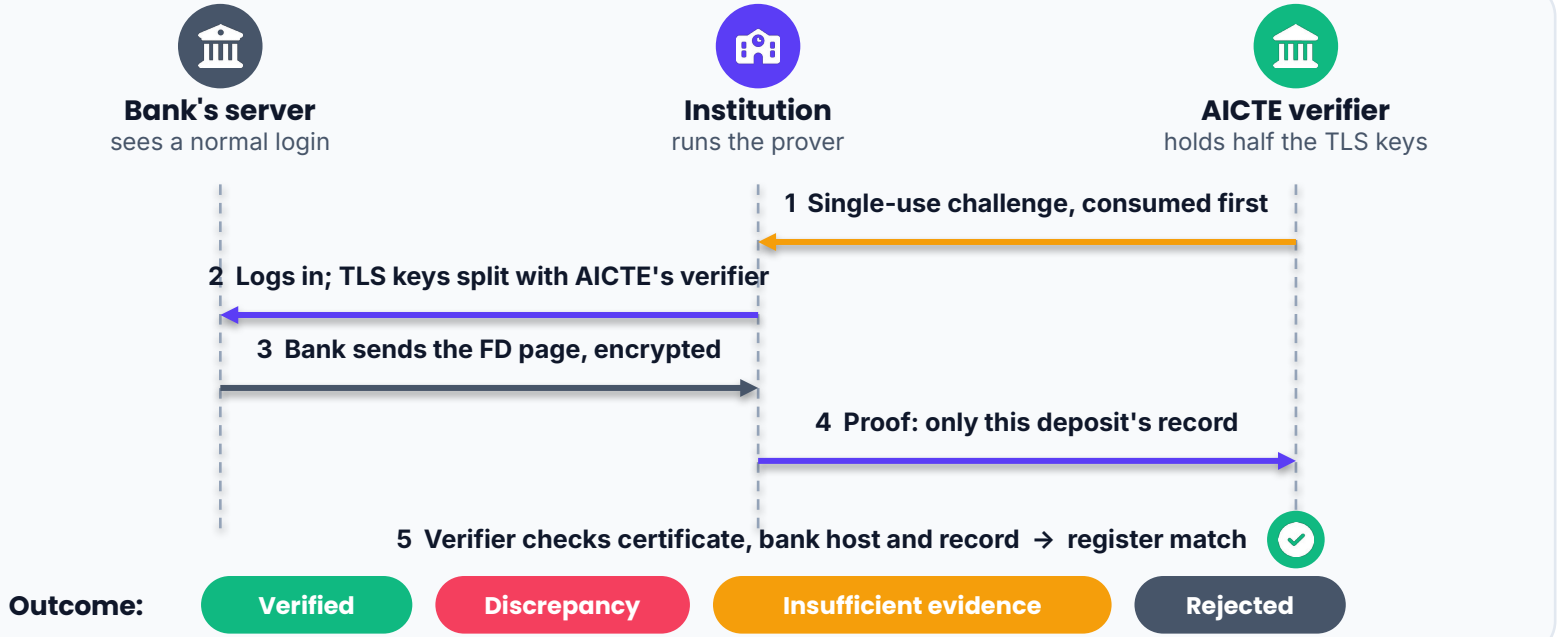

Backend
Python · FastAPI · SQLite
AES-GCM vault · hash-chained audit

Frontend
Server-rendered HTML · JS
Live 3-party proof view

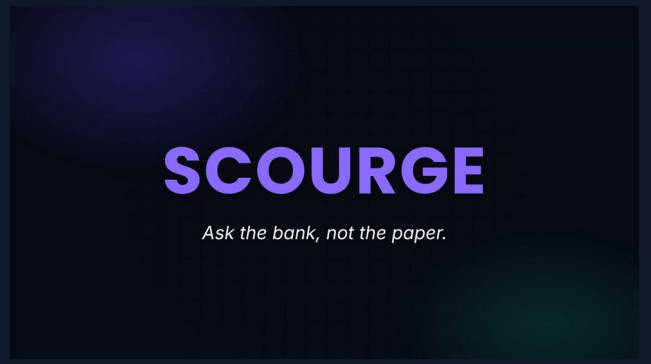

Ops & QA
Docker · nginx · GitHub CI
186 tests · 2FA · audits

Methodology and process for implementation (Flow Charts/Images/ working prototype)

In plain words: *an AICTE "notary" watches the bank page load, sees only the FD line, and nobody can change it.*

Synthetic bank + live SBI session

SCOURGE

FEASIBILITY AND VIABILITY

SMART INDIA HACKATHON 2026

Analysis of the feasibility of the idea

0.58 s
per bank proof
median of 60 runs · synthetic bank

SBI live
live split-key session, SBI API
HTTP 200 in 1.0 s · 30 Oct 2026

186 / 186
automated tests pass
incl. attack, forgery, 2FA, vault tests

₹0
software licences
one small server [estimate]

LIVE ON A REAL BANK
SBI · 30 Oct 2026 · own account

{"ok":true,"server":"api.onlineyono.sbi.bank.in","status_line":"HTTP/1.1 200 OK","secs":1.0}
Split-key session with SBI's production net-banking API; cert checked against public roots. Log: tools/realbank/RESULTS.md

Potential challenges and risks

	Strategies for overcoming these challenges
Bank page hides liens, or bytes are withheld	Fallbacks: bank-signed e-advice, then branch confirmation; never a guess
Fake bank site or a replayed old proof	Rejected: bank certificate + single-use, 15-min challenge
Proof of a different FD, or an edited screen	Rejected / no effect: FD bound to challenge; proof covers bank bytes
Bank encrypts data inside HTTPS, or ties it to the browser	Browser-extension prover; verifier gets the per-session app key

PILOT PLAN ✓ Prototype, 186 tests → ✓ Live SBI session (30 Oct) → FD pages at 3 large banks → 1 AICTE regional office → National rollout

SCOURGE

IMPACT AND BENEFITS

SMART INDIA HACKATHON 2026

Potential impact on the target audience

AICTE RB officers
A dated proof from the bank in seconds, not a letter in weeks

AICTE finance
The whole FDR book is re-checkable, before every release

Institutions
One short proof from their own net banking; Hindi or English

Students
29.6 lakh enrolled in 2025-26 (Lok Sabha reply); deposits checked all 10 years

Benefits of the solution (social, economic, environmental, etc.)

TODAY	WITH SCOURGE
Branch letter or uploaded screenshot	**The bank's own server, proven**
Checked once, trusted for 10 years	**Re-checked any time, before every release**
Weeks per confirmation	**0.58 s per proof (synthetic); 1.0 s live SBI session**
Hidden loans found at release, or never	**Pledge checked at the bank; two-officer release**

TESTED ON 180 FRESH DEPOSITS
Random amounts, dates, formats · real proofs · synthetic bank

119 / 119	bad deposits the upload portal approved
0 / 119	bad deposits Scourge verified
0 / 61	honest deposits Scourge accused

Social
students' deposits stay intact

Economic
stops loss before release

Environmental
no paper letters or couriers

Governance
accounts, 2FA, vault, chained audit
